BRAND GUIDELINES · V1.0 · OCTOBER 2026

lintel

Pay to unlock. *Proven* before you pay.

CONDITIONAL SETTLEMENT ON ZCASH

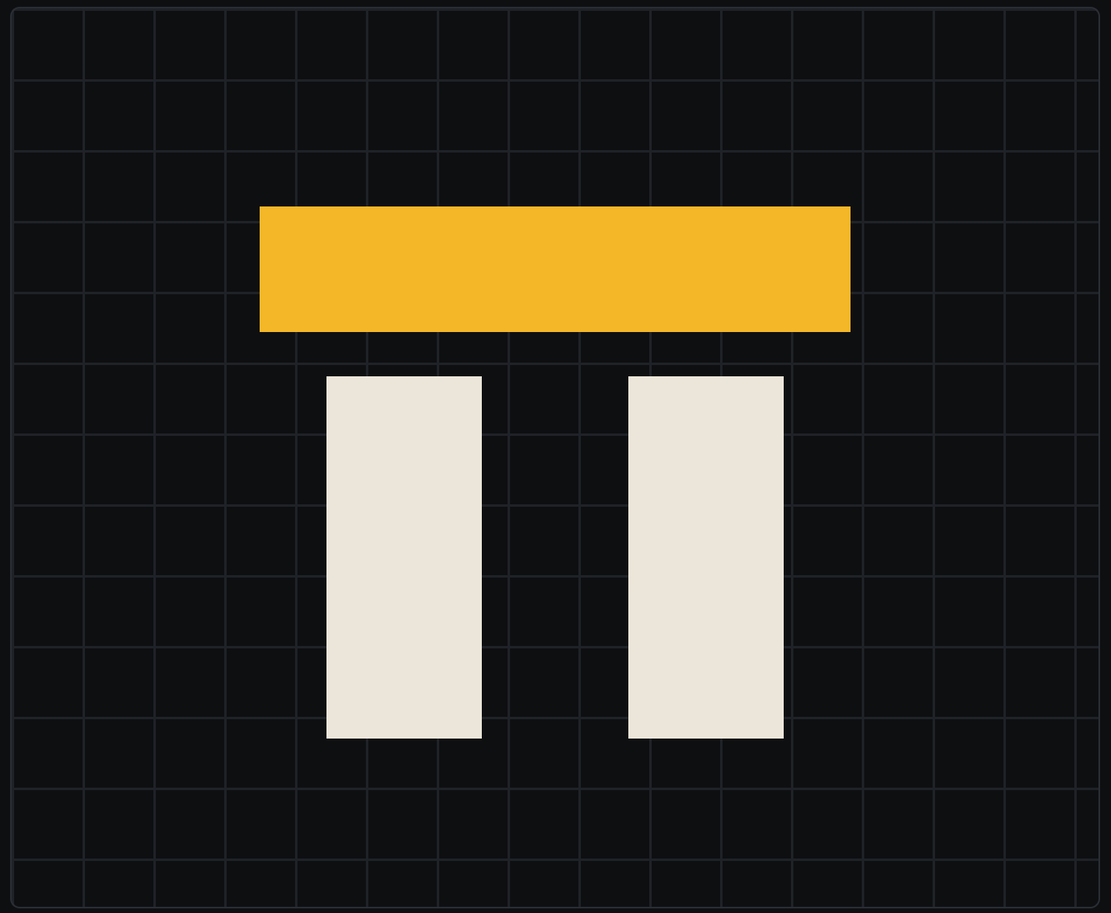
Two posts. One *beam.*

A lintel is the stone laid across two posts to make a doorway. It only stands when both posts carry it.

That is the protocol. A buyer and a seller each hold half of an adaptor signature. Neither can settle alone. When both bear the load, the payment clears and the secret that unlocks the goods is revealed on-chain, at the same moment, by the same transaction.

The mark is that structure, drawn as plainly as we can draw it: no gradients, no glow, nothing that has to be explained twice.

The mark, on a 96-unit grid.



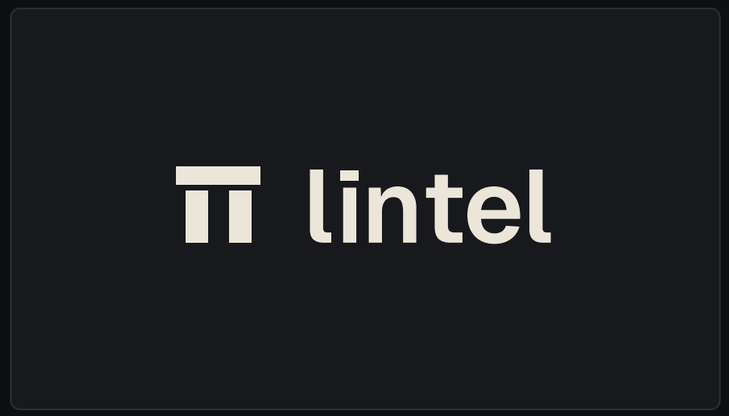
Beam: 80 × 17 units, in Amber. Posts: 21 × 49 units, in Bone. A 6-unit reveal separates beam from posts. The doorway between the posts is 20 units wide, the same as a post.

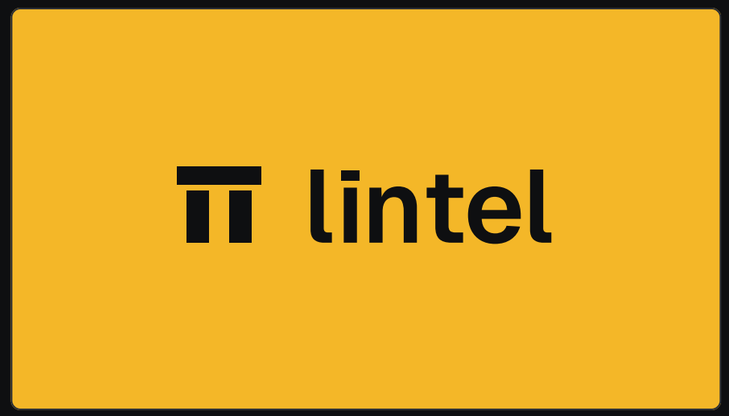
The reveal is not decoration. It shows the beam as its own piece, laid on, not grown out of the posts: two parties, one settlement.

The wordmark is Geist SemiBold, tracked −20. The tittle of the i is replaced with a small amber beam, so the name carries the mark inside it.

lintel

Use the lockup. Earn the mark.

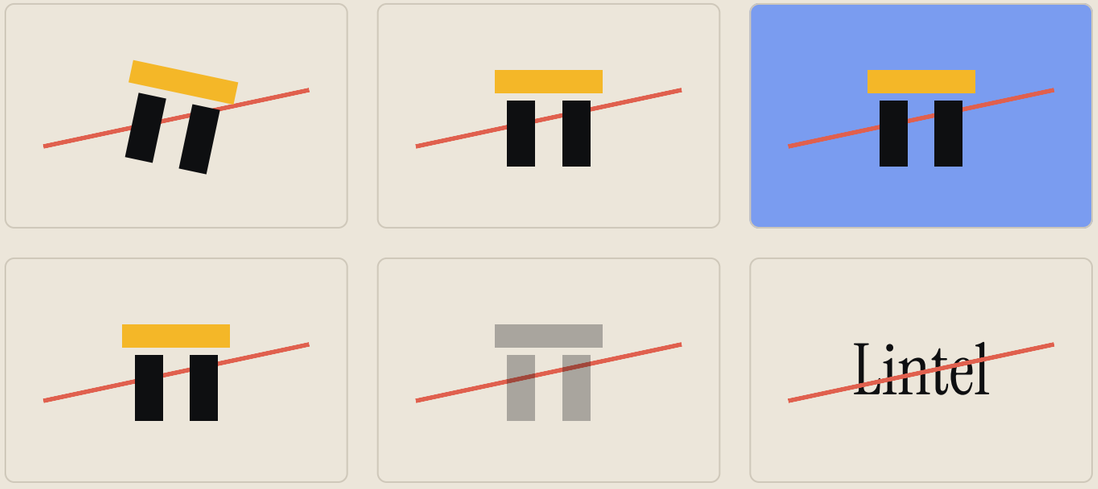




Full color on Ink or Bone first. One-color versions for single-ink print, embossing, and amber grounds. The mark alone is for app icons, favicons, and places where the name is already said.

Give it room. Don't touch it.

Clear space on every side equals the beam's height × 2. Minimum sizes: lockup 96 px wide, mark 16 px, wordmark 64 px.



Don't rotate, stretch, recolor, glow, fade, or retype it. If a version you need isn't in the kit, ask, don't improvise.

Stone, and one beam of *gold*.

Ratio, roughly: 80% stone, 15% bone, 5% amber. Amber means one thing: the action that moves value, or the brand itself. Never use it for decoration, links in body copy, or warnings.

DISPLAY · INSTRUMENT SERIF

Sealed until *settled.*

For headlines and moments only, never below 28 px. Italic in amber marks the one word that matters.

INTERFACE · GEIST

Sell a file. Get paid privately.

The buyer verifies a zero-knowledge proof that the goods match the listing before any ZEC moves. Regular 400, Medium 500, SemiBold 600.

0.02 ZEC

Pay & unlock

Say what the math says.

Precise, not hyped. We name the guarantee and its limit. “The seller can't take your ZEC without revealing the key” beats “trustless magic.”

Plain first, technical on request. Lead with what happens to the user. Put the adaptor signatures one tap away, never in the headline.

Calm under money. No exclamation marks near payments. No countdown theatrics. Say the block height, say what happens next.

WRITE

Proof verified. The file matches the listing.

NOT

~~Verified!! You’re good to go, fam!!~~

WRITE

Refund unlocks at block 4,522,631, about 70 minutes.
